

ECONOMY WORKSTATIONS

Incredibly sturdy workstations complete with cantilever top shelves and metal pegwall back panels making them ideal for workshops, packing areas and garages.

The steel frame simply taps together with a rubber mallet making assembly possible in under 10 minutes.

The top shelf features lipped edges to prevent items from falling off and the base shelf is height adjustable every 155mm.

The integral steel pegwall back panel is great for storing commonly used tools and equipment and you can even bolt a louvre bin panel onto it for small parts storage.

Choose from 1200mm or 1500mm wide in Blue.

Supplied with 15mm thick chipboard decks these workstations are a great addition to any workshop.
