

# Magnetic Lifters

- Compact hand operated magnetic lifters will lift plate, beams and round bar
- A large range of heavier duty capacity units are available on request
- Efficiently handles thin gauge sheet and tube
- Picks up an individual plate from a pile of steel sheets
- Solid block construction with magnetic strength over the whole contact area of the unit
- Anti corrosion on all working surfaces
- No residual magnetism left in load
- Automatic locking mechanism prevents accidental release whilst unit is in use
