

Steel Drum Band Heaters

- Steel drum band heaters are suitable for heating 105L and 200L drums
- Can heat a drum from 5°C to 27°C in 5 hours depending upon drum contents
- Band heaters have multiple uses; they can be used to prevent freezing, melt solids, heat liquids and maintain a constant temperature
- The band is simply wrapped around the drum and fastened into position. The heating element then efficiently and safely conducts heat to the drum. Multiple bands can be used to speed up the heating process and increase temperature
- A built in fully adjustable thermostat gives a temperature range of 20°C to 120°C
- Band heating element is housed in a flexible fibreglass reinforced silicone rubber which is resistant to temperature extremes, moisture and chemical attack
- Manufactured to BS EN 60335-1 and double insulated with class 2 electrical protection

Drum capacity	105L		200L		
	Electric supply	110V AC	230V AC	110V AC	230V AC
Electric output	800W	800W	1000W	1000W	1500W
Overall L x W	1300 x 125mm		1665 x 180mm
